

Amendments to the Specification

Please amend the Title to read as follows:

~~FIXED LENGTH DATA SEARCH DEVICE, METHOD AND DEVICE FOR
SEARCHING FIXED LENGTH DATA, COMPUTER PROGRAM, AND COMPUTER
READABLE RECORDING MEDIUM~~

Please amend the Abstract of the Disclosure to read as follows:

Embodiments of the present invention provide method and device for searching fixed length data. The ~~inventive device comprises~~ includes a hash operation means [[11]] for operating and outputting a hash value of inputted fixed length data, a data table memory [[14]] consisting of N numbers of memory banks, where N is an integer that is more than and equal to 2, the data table memory [[14]] for storing a data table holding a large number of fixed length data, a pointer table memory [[13]] for storing a memory pointer table holding a memory address at which each fixed length datum is stored with the said hash value as an index, and a comparison means [[15]] for simultaneously comparing a plurality of fixed length data stored at the same memory address in the said N numbers of memory banks with a single fixed length datum inputted to the said hash operation means, the comparison means [[15]] for outputting results of the comparison.
